

**SANDVIK****LH514****7.0M<sup>3</sup> BUCKET****BG00411403 - HALF ARROW**

TECHNICAL SPECIFICATION

**RELIABLE, PROVEN AND PRODUCTIVE**

Sandvik buckets are reliable, robust and proven to perform in underground hard rock applications. The advanced design provides good penetration of the muck pile, optimizes material flow during dumping and is constructed of wear resistant reinforced steel to extend the bucket's lifetime.

**FAST BUCKET FILLING**

Sandvik buckets are designed with Sandvik's smart boom geometry in mind to provide the highest in class breakout forces for fast bucket filling and handling of oversized rocks. The powerful boom and bucket hydraulics combined with smart geometry enable the use of both lift and tilt functions simultaneously when penetrating to the muck pile, making one-pass bucket filling easy and contributing to high fill-factors.

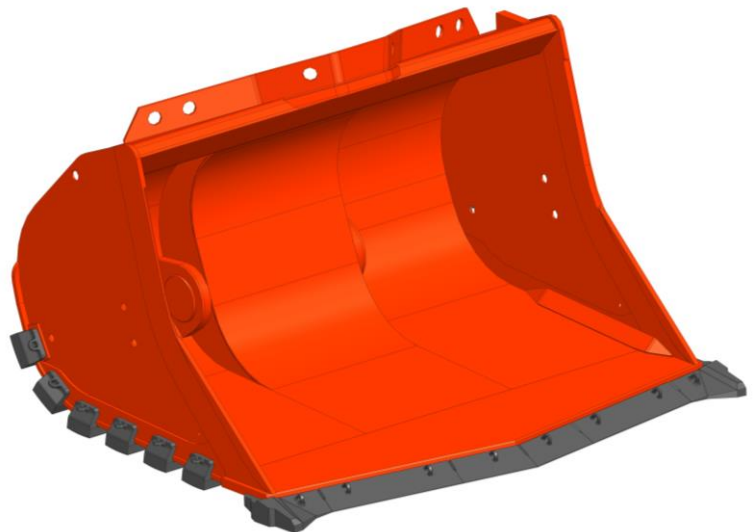

**LOWER BUCKET MAINTENANCE COSTS AND REDUCED DOWN TIME WITH GENUINE SANDVIK ACCESSORIES**

Sandvik GET's Half Arrow weld-on lip system for continuous edge underground loaders has been specifically designed to provide maximum penetration while maximising the amount of available wear material.

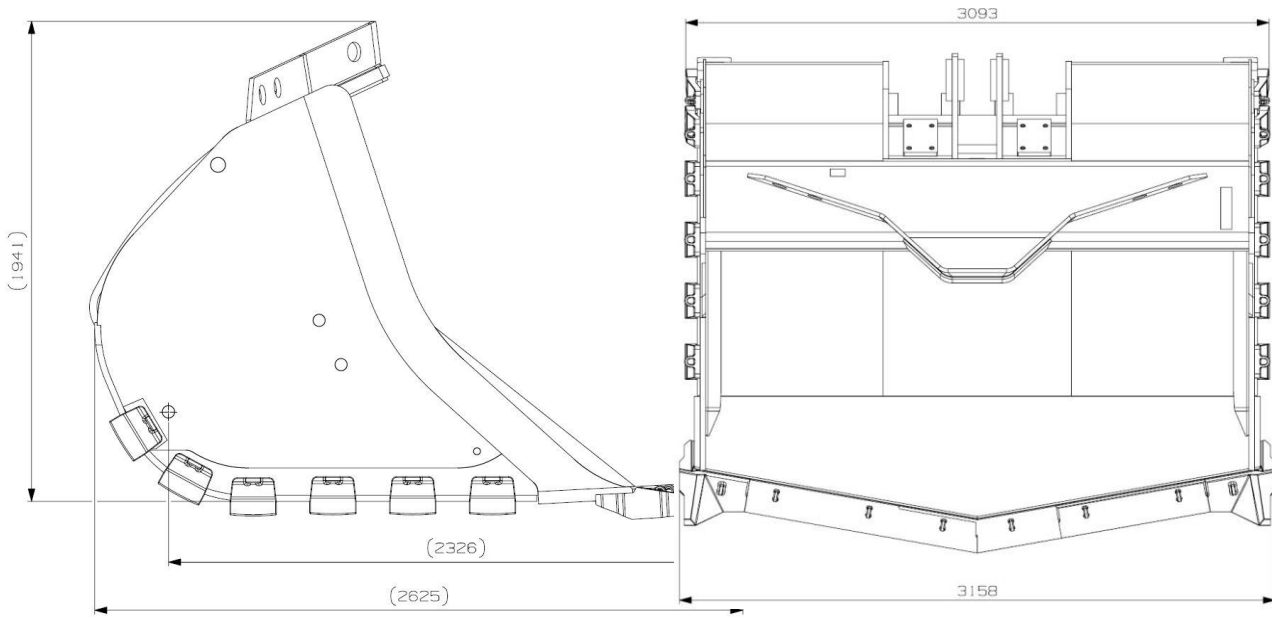

- High penetration edges reduce machine related costs such as fuel and tyre usage
- High strength, high hardness alloy provides high resistance to wear
- Efficient design ensures maximum available wear material and minimum throwaway material.
