

SANDVIK**LH514****7.0M³ BUCKET****BG00412007 - BLUE POINTER II**

TECHNICAL SPECIFICATION

RELIABLE, PROVEN AND PRODUCTIVE

Sandvik buckets are reliable, robust and proven to perform in underground hard rock applications. The advanced design provides good penetration of the muck pile, optimizes material flow during dumping and is constructed of wear resistant reinforced steel to extend the bucket's lifetime.

FAST BUCKET FILLING

Sandvik buckets are designed with Sandvik's smart boom geometry in mind to provide the highest in class breakout forces for fast bucket filling and handling of oversized rocks. The powerful boom and bucket hydraulics combined with smart geometry enable the use of both lift and tilt functions simultaneously when penetrating to the muck pile, making one-pass bucket filling easy and contributing to high fill-factors.

LOWER BUCKET MAINTENANCE COSTS AND REDUCED DOWN TIME WITH GENUINE SANDVIK ACCESSORIES

Sandvik GET mechanically attached lip shrouds provide a quick-change innovative wear solution for underground loaders.

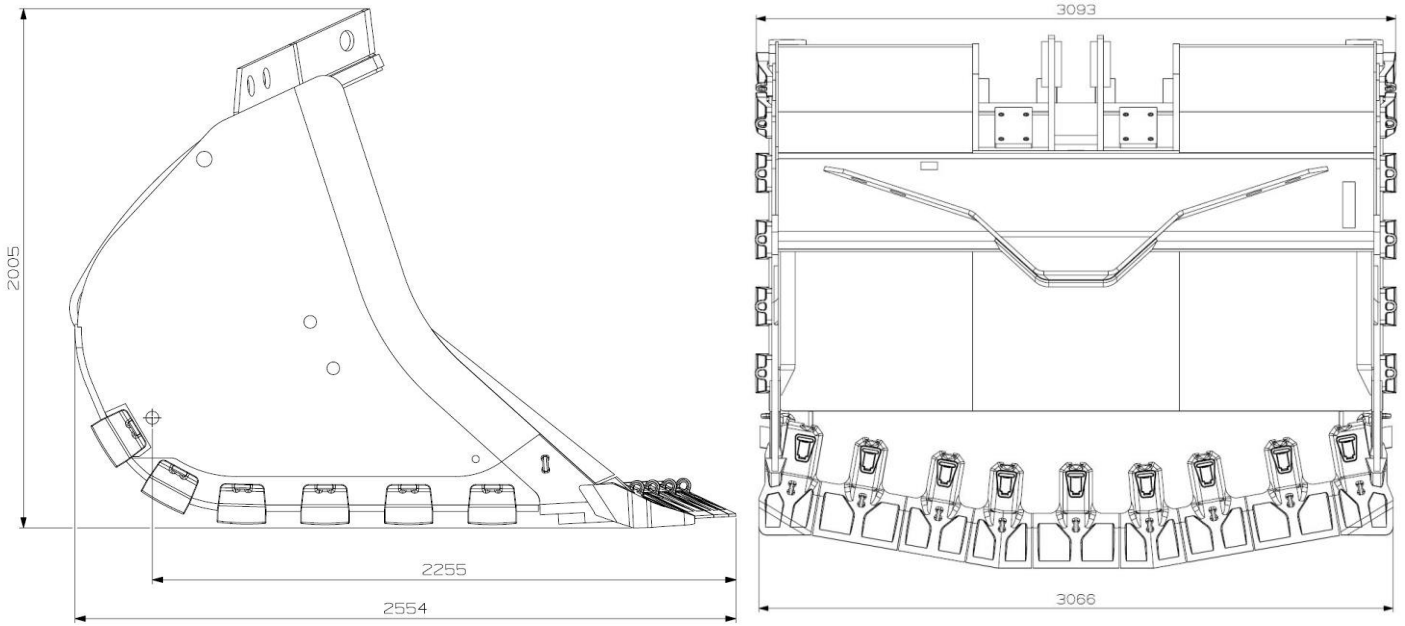

- Quicker and easier to change than existing underground GET systems
- Adjustable locking system reduces costly lip damage and change out times
- No welding required for change outs
- Low-profile blade provides increased penetration
- High strength, high hardness alloy provides high resistance to wear.
